

Tech 2 Pathing

Most of the practical Tech 2 pathing is listed on the following pages for your reference. Paths are arranged alphabetically beginning with the end result—the final “string” displayed on the Tech 2 screen.

Depending on the vehicle, each path originates with one of 12 selections: **Powertrain**, **Chassis**, **Body**, **Vehicle Control Systems**, **HVAC**, **Steering**, **Suspension**, **Brakes**, **Engine**, **Transmission/Transaxle**, **Body and Accessories**, and **Restraints**.

Search for a specific string by clicking one of the letters above to take you closer to the end string you seek, or by clicking on the Adobe Reader binocular “Find” icon  (usually located on the toolbar near the top of your screen) and keying in the exact phrase.

1-2 / 3-4 Shift Solenoid – Powertrain > Special Functions > Transmission Output Controls

1-2 / 3-4 Shift Solenoid – Powertrain > Special Functions > Transmission Output Controls > Solenoid Controls

1-2 Solenoid – Powertrain > Special Functions > Transmission Output Controls
